Issue:

Execute a Storm Drain Reimbursement Agreement between West Valley City and Dean and Bonnie Smith for improvements to be constructed at a project known as D & G Scale.

Synopsis:

Dean and Bonnie Smith are required to construct improvements on the storm water drainage system in order to complete their project.

Background:

There is an open channel that runs along the north boundary of the D&G Scale project. The channel is a main line on the City's storm drainage system. It is in the best interest of the City to have the ditch piped with the proposed 60-inch reinforced concrete storm drain pipe.

Recommendation:

Approve Storm Drain Reimbursement Agreement.
